### To Control Climbing Cutworms Infesting Grapes

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Lorsban-4E before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Lorsban-4E according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban-4E .

#### Directions for Use

**General Information and Mixing Instructions:** Lorsban\*-4E insecticide is recommended for use to control climbing cutworms infesting grapes. Use Lorsban-4E by thoroughly mixing with water to form an emulsion spray or drench. Refer to the label for Lorsban-4E for mixing instructions.

**Use and Dosage Recommendations:** Use Lorsban-4E by application as a pre-bloom spray at the rate of 1 quart per acre to control climbing cutworms. Mix the specified dosage in a minimum spray volume of 25 gallons of water per acre and apply as a dilute or concentrate spray. Lorsban-4E should not be tank mixed with pesticides, surfactants, or fertilizer formulations unless prior use has shown the combination to be noninjurious under your conditions of use. Consult your State Agricultural Experiment Station or Extension Service Specialist for proper time to treat in your area.

**Restrictions:** Do not make more than one application per season. Do not use in conjunction with a soil surface spray application of Lorsban-4E for grape root borer control.
